BLUETOOTH SMART WATER TIMER

The HydroSure Smart Water Timer is easily programmed on an Android or IOS phone application using Bluetooth communication.

- **Compatible with** iPhone IOS 8.0 or above, Android 4.4 or above with firmware
- **Communication protocol:** Bluetooth 4.0, BLE module
- **Communication distance:** 10m (no block connection)
- **Manual ON/OFF button (A)**
- **Flashing LED indicator (A)** blinks every 1 second when the batteries require replacement

INSTALLING THE APP

Power:
2 AA alkaline batteries
required (not included)

Battery life:
6 Months +

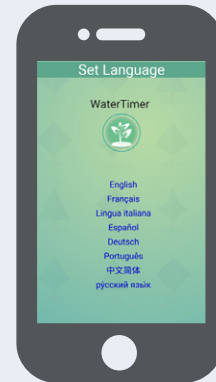

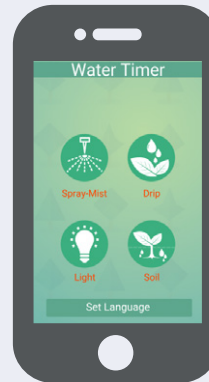

How to Use:

1. **Install the App** on your smart phone by searching “**Water Timer Plus**” (for IOS & Android)
2. **Install 2 AA Alkaline batteries** in the enclosed compartment (not included)
3. **Enable Bluetooth** connection on your phone

APP Setting Procedure:

1. **Open the App** and choose your preferred language. (English, French, Italian, Spanish, German, Portuguese, Chinese or Russian)

HOW TO USE

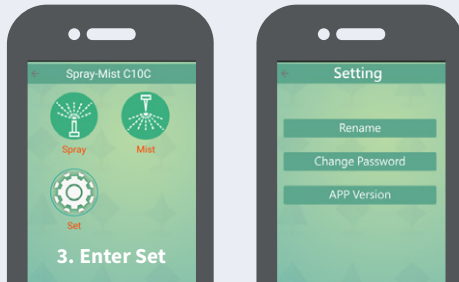

1. Click on the function you would like to use.

(e.g. Spray-Mist), and choose the product name to establish a connection.

2. Spray or Mist watering function. The timer can be renamed and a password created for ease of watering zone identification and to avoid unwanted connection from another cell phone with the timer.

3. Enter Set

Spray or Mist Watering Function.

1. Open the App and choose either the spray or mist watering function.
2. Select the controller's name to establish a connection
3. Enter Set

The built-in Watering Cycle Function can be easily adjusted in-app to set the watering duration into smaller watering cycles.

Two start times allow watering for a short time then pauses and re-commences watering, this acts as the soak time, minimising wastage and runoff.

Spray Mode:

Duration: Length of Watering Cycle

Cycle: The Day of the Week Watering Takes Place

Start 1: Time of Day First Watering Cycle Takes Place

Start 2: Time of Day Second Watering Cycle Takes Place

(Two start times allow water to soak into the ground minimising water wastage and runoff)

Rain Delay: Delays Watering by 0-7 Days

AUTO: Automatic watering mode

OFF: Shuts off the programs immediately

MANUAL: Instant manual watering

Mist mode:

Duration: Length of Watering Cycle

Cycle: The Day of the Week Watering Takes Place

Start 1: Time of Day First Watering Cycle Takes Place

End 1: Ends watering at a specific time

Start 2: Time of Day Second Watering Cycle Takes Place

End 2: Ends watering at a specific time

Rain Delay: Delays Watering by 0-7 Days

AUTO: Automatic watering mode

OFF: Shuts off the programs immediately

MANUAL: Instant manual watering

EXAMPLE MODE SETTINGS

SPRAY mode:

1. **AUTO:** Begins automated watering programs.
2. **OFF:** Switches the timer and any watering application off.

MIST mode:

1. **AUTO:** Begins automated watering programs.
2. **OFF:** Switches the timer and any watering application off.
